SKILLS

- Proficient in HTML, CSS, JavaScript, and TypeScript
- Experienced building responsive and modular front-end architectures
- Skilled with C#, Python and building RESTful APIs
- Knowledge of SQL, writing stored procedures, and database optimization
- Developed cross-platform mobile apps using Flutter and React Native
- Experienced with Docker, Docker Compose, and Kubernetes for container orchestration.
- Familiar with AWS and Azure services and infrastructure
- Designed scalable microservices using RabbitMQ and Redis for queueing and caching.
- Implemented robust service workers and schedulers.
- Implemented CI/CD pipelines for streamlined delivery and deployment.
- Managed code repositories using Git and Gitflow workflows.

TECHNOLOGY

- Frontend: ReactJS, Angular, React Native, Flutter
- Backend: .Net Core, ABP Framework, NodeJS, Flask, Java Spring Boot
- Database: MS SQL, PostgreSQL, Oracle DB, Mongo DB
- DevOps: Docker, Kubernetes, IIS, AWS, Azure,
- Other: GitFlow, Github Action, CI/CD, Jira

PROFILE

Fullstack Developer with a solid foundation in software development and a growing skill set in DevOps practices. With one year of hands-on experience, I have gained proficiency in both front-end and back-end development, working with various technologies and frameworks. My passion for creating intuitive and efficient applications drives my continuous learning and improvement. I am eager to contribute to a collaborative team, leveraging my expertise to deliver high-quality solutions while further developing my skills in the ever-evolving field of software development and DevOps.

WORK EXPERIENCE

Software Engineer

Sacombank - Saigon Thuong Tin Commercial Joint Stock Bank 01/2023 - Present

- Develop and maintain RESTful APIs and microservices using .NET Core and ABP Framework for core banking systems. Implement caching with Redis and messaging with RabbitMQ to improve performance and reliability.
- Work collaboratively in an Agile team to complete tasks and features for an integrated banking platform, participating in both front-end and back-end development.
- Lead a mobile app development project using React Native to extend core banking capabilities to customers on iOS and Android devices. Manage mobile team members and oversee planning, development, testing, and release of the app.
- Consult with business analysts and product owners to understand requirements and translate them into pragmatic software solutions.
- Containerize services using Docker and orchestrate deployments using Kubernetes to improve scalability and efficiency.
- Implement CI/CD pipelines, infrastructure as code, and automated deployments using Jenkins to streamline delivery processes.
- Troubleshoot issues across the full tech stack and continuously deploy improvements to enhance system stability.
- Contribute to code reviews, documentation, and knowledge sharing to uphold team standards.

Software Engineer

Rozitek - Intelligent Intralogistics Solutions 06/2022 - 01/2023

- Provided technical leadership, oversaw the planning and structuring of projects to develop a robust Warehouse Management System (WMS) product. Technologies utilized included .NET Core, NextJS, and PostgreSQL.
- Collaborated closely with automation engineers to address complex customer issues outside their scope by leveraging Socket or CronJob functionalities.
- Engaged directly with customers to ensure seamless integration of our solutions with their systems, utilizing RESTful APIs or database connections for efficient data exchange.
- Took charge of server building and configuration, with a focus on deploying projects on CentOS and implementing CI/CD practices to streamline the deployment process.
- Facilitated effective coordination and communication with outsourced partners for smooth ERP maintenance and handover. The ERP system was developed using Java, ReactJS, and MySQL.
- Was responsible for the maintenance and updates of the company's portfolio pages, which were built on the WordPress platform, ensuring optimal functionality and user experience.

TAN PHAT VO

FULLSTACK DEVELOPER

EDUCATION

Bachelor of Information Technology

Ton Duc Thang University

2018-2023

Software Engineer

CERTIFICATE

IELTS : 6.5 (2022)

TOEIC: 65 (2020)

AWS Certified Solutions Architect -
Associate (In progress)

WORK EXPERIENCE

Fullstack Developer

Apollo English

06/2022 - Present (Part time)

- Successfully integrated third-party payment systems like Vietcombank and Payoo, ensuring seamless and secure payment processing.
- Maintained and supported existing software modules, analyzing business requirements and fixing bugs in legacy code.
- Worked closely with product managers and business analysts to understand software requirements and bridge communication gaps between business and technical teams.
- Improved software quality and system stability by refactoring old code and implementing best practices for maintainability.
- Identified performance bottlenecks and resolved issues to improve overall system speed and scalability.
- Worked with OCB Bank's outsourced development team to implement a Kanban module for task management

Junior Fullstack Developer

Apollo English

12/2021 - 06/2022 (Fulltime)

- Managed and maintained the system, resolved bugs, implemented UI and backend modifications, and introduced innovative features to enhance capabilities. Demonstrated leadership by mentoring a junior team and fostering collaboration.
- Developed robust applications using AngularJS, Angular, ReactJS, and .Net frameworks with a Postgresql database, delivering optimized user experiences.
- Spearheaded the implementation of CI/CD pipelines, leveraging industry best practices to streamline the deployment process across different environments such as development, QC, and production. This involved automating build, test, and deployment steps, resulting in faster and more reliable software releases.
- Ensured efficient knowledge transfer through comprehensive project documentation.
- Managed GitFlow for a small team, enforced branching strategies, and conducted code reviews to minimize conflicts.
- Practiced Agile and Scrum methodologies, participated in ceremonies, and contributed to high-quality software delivery.
